DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed December 17, 2007 are acknowledged.

Claim Rejections - 35 USC § 102

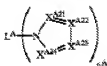

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-4 and 7-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Ise et al., U.S. Patent Number 6,962,755.

Ise discloses a light-emitting element comprising at least a light-emitting layer containing a light emitting material and a host material disposed between two electrodes (column 3, line 55-column 4, line 5). The reference discloses that the light emitting layer comprises a compound with the general formula (see column 13)

Art Unit: 1794

Ise reads on the present claims when n^A is 2; X^{A21} and X^{A24} are nitrogen; X^{A22} and X^{A23} combine to form a ring, preferably a 6-membered aromatic ring, and L^A can be a bivalent group such as

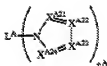

. Ise's general formula A-II reads on present formulae I and III in present claims 1-

2 when a, b and c are zero and Ar^1 and Ar^2 are . The Ise reference also reads on instant claim 8 when the 2H-benzotriazole has the general formula IIIa.

Response to Arguments

4. Applicant's arguments filed December 17, 2007 have been fully considered but they are not persuasive. Applicant argues that the Ise reference does not read on the present claims. It is disclosed in column 13 of the Ise reference formula A-II.

Formula A-II reads on the present claims when X^{A22} and X^{A23} form a 6-membered aromatic ring; X^{A21} and X^{A24} are both nitrogen; n^A is 2 and L^A is a phenylene ring. The Ise reference reads on formula III with Y^1 being represented by L^A . Applicant argues that Ar^1 and Ar^2 are defined in the present claims as a C6-C-30 aryl. X^{A22} and X^{A23} form a 6-membered aromatic ring, which is a C6-C30 aryl. The rejection is maintained.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
